

CRDTS DENTAL HYGIENE “FULL MOUTH PATIENT SCREENING” WORKSHEET

This worksheet should be copied and used to screen potential patients for the CRDTS Dental Hygiene Examination.

- This worksheet can be brought into the exam BUT it will NOT be submitted to examiners.
- Use this worksheet in combination with the “Treatment Selection” Worksheet to determine patient acceptability.
- Chart ONLY surfaces of “qualifying” subgingival calculus.
- “Qualifying” deposits will exhibit such characteristics as: significant enough in quantity to be readily discernible or detectable; a definite “jump” or “bump” which are easily detected with one or two strokes; a deposit that easily “binds” or “catches” the explorer; ledges, ring, spiny or nodular formations.
